

# CARBON MONOXIDE POISONING is **100%** preventable.

## Know it.

Carbon monoxide is an **odorless, colorless and tasteless gas.**

You **WILL NOT** be able to sense a carbon monoxide leak.

Carbon monoxide is **produced when any source of fuel is burned.\***

\*Examples include: grills, furnaces, water heaters, automobiles, boats, stoves, generators, gas ranges, fire places, portable heaters and chainsaws.

## Avoid it.

**Keep portable generators outdoors** and away from windows and doors.

**Avoid idling cars** inside closed garages.

Get furnaces and other **fuel-burning appliances** serviced regularly.

**Don't use camp stoves, grills or gas-burning tools** like chainsaws indoors.

## Prevent it.

**Install a carbon monoxide detector** near any area used for sleeping.

Use a carbon monoxide detector while **boating, camping and ice fishing.**
